

TABLE OF CONTENTS

1. OVERVIEW	1
1.1 Introduction.....	1
1.2 Scour Types	2
1.3 Abbreviated Chronology of Technology Development.....	4
1.4 Scope and Objectives.....	7
2. FUNDAMENTALS OF UNLINED SPILLWAY EROSION	11
2.1 Introduction.....	11
2.2 Erosion Mechanics.....	12
2.2.1 Headcutting of Spillway Channels.....	12
2.2.2 Hydraulic Fracturing and Scour in Plunge Pools.....	13
2.3 Air Entrainment	15
2.4 Hydrodynamic Properties	17
2.4.1 Introduction.....	17
2.4.2 Pressure Fluctuations	18
2.4.3 Forces.....	19
2.5 Geologic Factors	22
2.6 Spillway Erosion Prediction	25
2.6.1 The Annandale Model.....	25
2.6.2 The USDA Model.....	26
2.6.3 The U.S. Army Corps of Engineers Methods	27
2.7 Scour and Pressure Fluctuations	28
2.7.1 Bollaert’s Comprehensive Scour Model	28
2.8 Notation.....	28
3. ANNANDALE’S ERODIBILITY INDEX METHOD	31
3.1 Introduction.....	31
3.2 Material Resistance.....	33
3.3 Erosive Power of Water	33
3.4 Erosion Threshold.....	34
3.5 Determination of Erodibility.....	36
3.6 Determination of Extent of Scour	38
3.7 Application.....	39
3.7.1 Hydraulic Jumps	40
3.7.2 Bed Slope Change.....	41
3.7.3 Channel Flow	41
3.7.4 Plunge Pool	42
3.8 Summary	45
3.9 Notation.....	45
4. USDA EROSION MODEL	47
4.1 Introduction.....	47
4.2 USDA Unlined Spillway Erosion Model.....	47
4.2.1 Phase I.....	48

4.2.2	Phase II.....	50
4.2.3	Phase III	51
4.2.4	Application.....	54
4.3	Headcut Erodibility Index	55
4.4	Extension of USDA Model	56
4.4.1	Threshold Modification	56
4.4.2	Application.....	59
4.4.3	Additional Spillway Erosion Case Histories.....	59
4.5	Notation.....	62
5.	REMR METHOD	65
5.1	Introduction.....	65
5.2	Erosion Risk Classes.....	65
5.3	Erosion Potential.....	66
5.3.1	Lithology.....	66
5.3.2	Substance	66
5.3.3	Genesis.....	68
5.3.4	Tectonics.....	68
5.3.5	Rock Mass.....	68
5.4	Application.....	68
5.5	Notation.....	69
6.	BOLLAERT'S COMPREHENSIVE SCOUR MODEL.....	71
6.1	Introduction.....	71
6.2	Experimental Modeling of Dynamic Pressures in Rock Joints	72
6.2.1	Test Facility	72
6.2.2	Plunge Pool Bottom Pressures	73
6.2.3	Transient Rock Joint Pressures	75
6.3	Physical Background of Rock Failure Criteria.....	76
6.3.1	Relationship Between Wave Celerity and Pressure Inside a Rock Joint.....	76
6.3.2	Philosophy of Rock Failure	78
6.3.3	Failure Criteria for Partially Jointed Rock.....	80
6.3.4	Failure Criteria for Completely Jointed Rock.....	81
6.4	Comprehensive Scour Model.....	83
6.4.1	The Module of the Falling Jet.....	84
6.4.2	The Module of the Plunge Pool	85
6.4.3	The Module of the Rock Mass.....	87
6.5	Application Example	93
6.5.1	Scour Computation for One Rock Layer	94
6.5.2	Scour Computations with Depth.....	96
6.6	Conclusions.....	97
6.7	Notation.....	97
7.	MAINTENANCE AND REMEDIAL MEASURES.....	101
7.1	Introduction.....	101

7.2	Remedial Measures	101
7.3	General Remedial Measures	102
	7.3.1 Reduced Frequency of Operation	103
	7.3.2 Reduced Velocity	107
7.4	Channel Lining.....	110
	7.4.1 Vegetation	110
	7.4.2 Rock Riprap	111
	7.4.3 Concrete Paving	112
	7.4.4 Roller Compacted Concrete	112
	7.4.5 Mats.....	113
7.5	Erosion Cutback Prevention	113
	7.5.1 Cutoff Wall	113
	7.5.2 Rock Anchors.....	114
	7.5.3 Energy Dissipation.....	114
7.6	Materials Stabilization	114
	7.6.1 Soil Cement.....	115
	7.6.2 Shotcrete	115
8.	MONITORING AND EVALUATION	117
	8.1 Introduction.....	117
	8.2 Pre-Overflow.....	117
	8.3 During the Flood	118
	8.4 After the Flood.....	118
	REFERENCES	121
	APPENDIX A — TUTTLE CREEK SPILLWAY	133
	Introduction.....	133
	Tuttle Creek Dam.....	134
	Tuttle Creek Spillway	134
	Geology of Tuttle Creek Spillway	137
	Flood of 1993.....	139
	Spillway Erosion.....	139
	References.....	141
	APPENDIX B — SAYLORVILLE LAKE SPILLWAY.....	143
	Introduction.....	143
	Saylorville Dam	144
	Saylorville Spillway.....	144
	Geology of Saylorville Spillway.....	146
	Spillway Discharge	148
	Spillway Erosion.....	151
	Spillway Damage	152
	References.....	156

APPENDIX C — OVERTOPPING OF GIBSON DAM.....	157
Introduction.....	157
Gibson Dam	157
Gibson Spillway.....	157
Overtopping During the Extreme Storm on June 8, 1964	157
References.....	164
APPENDIX D — PAINTED ROCK DAM	165
Introduction.....	165
Painted Rock Dam	166
Painted Rock Spillway	166
Geology of Painted Rock	166
Flood of 1993.....	169
Erosion	169
Conclusions.....	172
References.....	173
APPENDIX E — WHITE OAK SPILLWAY.....	175
Introduction.....	175
White Oak Spillway	175
Sites Input	175
Sites Output.....	182
Reference	183
