

TABLE OF CONTENTS

CHAPTER 1 — INTRODUCTION	1
Bartlett Dam, Arizona	1
Ricobayo Dam, Spain	4
Gibson Dam, Montana.....	5
Kariba Dam, Zambia/Zimbabwe, Africa	6
CHAPTER 2 — ROCK SCOUR MECHANISMS.....	9
Inherent Nature of Earth Materials: Physical and Chemical Gels	9
Jointed Rock – A Physical Gel.....	11
Massive Rock – A Chemical Gel	12
Rate of Scour	15
Dominant Material Properties	17
Mass Strength.....	17
Block Size.....	17
Discontinuity Shear Strength.....	17
Orientation and Shape of Rock Blocks	17
CHAPTER 3 — EROSION CAPACITY OF WATER	19
Practical Implications.....	22
Shear Stress.....	22
Stream Power	23
Quantification of Pressure Fluctuation.....	25
CHAPTER 4 — OVERVIEW OF TECHNOLOGY	27
Erosive Capacity of Water	27
Dynamic Pressures	27
Stream Power	31

Threshold Conditions	32
Empirical Characterization	32
Brittle Fracture.....	34
Rate of Scour	35
Extent of Scour	36
CHAPTER 5 — CASE STUDY: KARIBA DAM.....	39
Project Background.....	39
Scour Processes	39
Total Dynamic Pressure Coefficient	40
Average Dynamic Pressure Coefficient (C_p).....	40
Fluctuating Dynamic Pressure Coefficient (C'_p).....	41
Scour Prediction Methods.....	42
Rock Resistance	42
Jet Erosive Capacity	42
Scour at Kariba Dam.....	43
CHAPTER 6 — BIBLIOGRAPHY	45
APPENDIX	47
